The Worldwide IC Packaging Market, 2010 Edition

Synopsis

After an unprecedented five years of continuous market growth, the semiconductor industry faltered in late 2009 as the global economic crisis struck hard. So, where is the industry headed now and what are the implications for the IC packaging industry? **New Venture Research (NVR)**, in the **2010 Edition of The Worldwide IC Packaging Market**, analyzes the semiconductor industry and uses this analysis to forecast the future of the global IC packaging market.

The report begins with NVR's views on the state of the semiconductor industry, along with a top level forecast (see Figure 1). This discussion includes factors bearing on individual semiconductor products as well as global economic factors. The financial performance of the publicly-traded SATS companies' is also addressed.

Figure 1 IC Unit Forecast

Following this high-level review, the report presents forecasts for each semiconductor product type, and segments these products by package family and I/O count range. Packaging revenue figures are displayed for each segment, based on prices charged in the contract assembly market. The package families are then rolled up by I/O count and semiconductor product. In doing so, the report generates the total value of the IC packaging industry.

Next, the report presents NVR's continuing, extensive coverage of the packaging contractor market. Packaging contractors will continue to assume a larger share of the world's IC packaging business. The report breaks the contractor market down by package families and major product categories providing units and revenue for each category. To help you further assess this group of companies, the report profiles the activities of the world's largest contractors and the packages they offer.

The Worldwide IC Packaging Market, 2010 Edition continues NVR's leadership position in assessing the status and future of IC packaging. This report will provide you with an effective and economical tool for assessing the future of this market. The report sells for \$2995 with extra single user licenses at \$250. This report is only available in PDF format and is delivered by email. Corporate licensing is available—contact us for pricing.
