ABOUT THE AUTHOR

Randall Sherman is the president and principal analyst of New Venture Research Corp., a technology market research and business consulting firm focused on the EMS and OEM electronics manufacturing industries. Mr. Sherman has more than 25 years' experience in technology and business research. He began his career as a telecom network design engineer and holds an undergraduate degree in Astrophysics. He has held senior positions at various market research firms, including Creative Strategies, Frost and Sullivan, and BIS Strategic Decisions. Mr. Sherman holds an MSEE from the University of Colorado and an MBA from the Edinburgh School of Business.

ABOUT NEW VENTURE RESEARCH CORPORATION

New Venture Research (NVR) was formed in 1988 to assist industry executives in their decision making. We began as an independent consultancy and have recently evolved into a publisher of off-the-shelf market research reports in key areas of the electronics industry. The reports are written by a team of staff analysts and independent consultants. We also offer consulting services when our clients need information not found in our reports.

The backbone of each report is based upon primary market research information. Our market information originates from direct interviews with vendors, users, and other industry participants. We use secondary research to test for reasonableness, technical backgrounds, and, in some cases, for top-level forecasts. We distill the research into coherent forecasts and recommendations.

We are dedicated to providing our customers with accurate reporting on our targeted markets. One of our reports can save our customers months or years of research. The reports enable executives to make decisions in a structured manner. Our customers tell us these reports are excellent tools for building consensus regarding their company's real market opportunities.

DISCLAIMER

The author and publisher have used their best efforts to assure the accuracy of the material used in preparing this report.

The author and publisher make no warranty of any kind, expressed or implied, with regard to the information contained in this report. The author and publisher shall not be liable in any event for incidental or consequential damages in connection with, or arising from, the information contained in this report.

Any reference to particular products or manufacturers to illustrate points made in this report should not be construed as an endorsement of said products or manufacturers.

The opinions contained herein are those of the author and are based upon published and unpublished information obtained from a variety of sources, telephone and personal interviews with industry participants, and many years of experience.

SOFTWARE LICENSE AGREEMENT

This report is provided in PDF electronic file format. For considerations received, New Venture Research Corp. (NVR) hereby licenses this electronic copy of the report as described in this License Agreement to “You” the corporate or individual licensee. This License Agreement applies to all electronic file copies of the report for which you have purchased or otherwise been granted a license by NVR. Any use of the electronic file copy of the report indicates your acceptance of these terms.

The report and all electronic copies thereof are protected by both United States copyright law and international treaty provisions. You may not distribute any portion of the report unless otherwise specified in your purchase agreement with NVR. The electronic file copy of the report may be freely moved from one computer location to another, but may not be used by more than one (1) person simultaneously.

A corporate or “enterprise-wide” license permits unlimited use within the purchasing company. Distribution to others (contractors or third parties) outside the company is not allowed without written permission.

Table of Contents

Chapter 1 Introduction	1
1.1 Report Objectives and Scope.....	1
1.2 Organization.....	2
1.3 Assumptions.....	3
1.4 Definitions.....	3
1.5 Research Methodology.....	4
1.6 Field Questionnaire.....	5
1.7 Market Segments.....	7
Chapter 2 Executive Summary.....	8
2.1 Overview	8
2.2 Worldwide Electronics Market Forecast	9

Chapter 1 Introduction

1.1 Report Objectives and Scope

The objective of this report is to provide a macro- and microeconomic understanding of the worldwide contract manufacturing (CM) services market for interested electronics manufacturing services (EMS) firms, original design manufacturers (ODMs), original equipment manufacturers (OEMs), component manufacturers, equipment suppliers, distributors, consultants, and investment analysts. Throughout this report, CM will refer to the combined industry, whereas EMS and ODM companies are the primary subcontractors.

In this report, 102 contract manufacturers and original design manufacturers are profiled. NVR (and its predecessor Electronic Trend Publications) has followed this market for over twenty years, continuously expanding its coverage and market analysis. With each new report, NVR's research methodology, quality of data, and collective knowledge have improved, to the benefit of the reader and the entire industry.

For the last twenty years or more, the generic term “contract manufacturing” has been identified almost solely with a very specific niche within the overall durable goods market—that of electronics equipment. This is ironic, as the notion of “contract manufacturing” could be applied to any industry segment (aerospace, appliances, automotive, construction, etc.) that manufactures finished goods, yet over the last few years it has been exclusively linked to the electronics—specifically the high-tech electronics—market segment. As the electronics manufacturing industry has evolved over the years, the term “electronics manufacturing services” (EMS) has come to be used to refer both to the overall industry and to a specific class of subcontractor.

The current report focuses on the entire CM market, but pays special attention to the production of advanced, state-of-the-art electronics products, which are having a considerable impact on the world today. Indeed, the availability of microprocessor-driven wireless communication devices, handheld computing products, remote sensors, and semiconductor-based technologies is dramatically impacting the way people live. Yet it is probably fair to say that these products would not be so widespread were it not for the emergence of the EMS industry, which has lowered product costs and increased manufacturing efficiency.

The EMS market experienced continuous growth in the fifteen years prior to 2001, when it then underwent a two-year slump and consolidation. In 2003, the market began to recover and grew strongly up to 2009, when it experienced another slump and was flat in 2010. Since then, the market briefly rebounded and starting in 2011 continued to expand until 2013, when the industry went flat through 2016. Starting in 2017, the market significantly recovered, with relatively high growth of 10.8 percent from the previous year. In 2018, the industry experienced growth of 15 percent and set new records in revenue.

The purpose of the 2019 edition is to analyze the changes that have taken place over the last year and offer some projections on how the CM market might unfold over the next five years. Inevitably, the EMS and ODM markets experience changes in cycles, inventory, and end-user demand that have always proven to be irregular. Our forecasts are generally linear in design, as no one can accurately predict the future except in general terms. We can only look to the past for guidance and speculate on the impact of the latest technologies and geopolitical events. This report analyzes those changes and discusses the implications of the key dynamics impacting the market in the near future.

1.2 Organization

This report is organized into eight chapters. Chapter 1, “Introduction,” outlines the scope, organization, and methodology for the report. Chapter 2, “Executive Summary,” presents top-level data from throughout the report.

Chapter 3 is titled “Economic Outlook and Worldwide Electronics Industry Forecast.” Key products are forecast in seven major electronics market segments, including computers, communications, consumer, industrial, medical, automotive, and defense/other transportation.

Chapter 4, “Industry Structure,” analyzes the total EMS industry by region and market segment. Since the “Internet of Things” has emerged as a technical reality, we have decided that we must track this through all the traditional market segments, such as the smart home, industrial, medical, and transportation industries.

Chapter 5, “CM Industry Forecasts, 2018–2023,” forecasts growth in the EMS marketplace from 2018 to 2023. As in Chapter 4, data is presented by 52 individual countries and 52 individual product segments (5 new segments are in the IoT category).

Chapter 6, “Financial and Production Benchmarks,” looks at a variety of key metrics in 2018 that can be used to judge the manufacturing efficiency and financial health of the large public CMs and ODMs (all with revenue of at least \$100 million a year).

Chapter 7, “Mergers and Acquisitions,” presents information on the many deals that are driving the EMS market. Deals from 2013–2018 are detailed.

Profiles of major EMS companies and ODMs are given in Chapter 8. These profiles provide a look at these companies’ strategies, service offerings, manufacturing facilities, and financial data.

1.3 Assumptions

The following assumptions have been made with regard to information provided in this report:

- Respondents are providing truthful information to the best of their ability.
- Values are mainly provided in current US dollars as converted by the International Monetary Fund, World Outlook Database.
- Wage rates have not been adjusted to reflect the depreciation of the euro or the undervaluation of the Chinese yuan or the New Taiwanese dollar and other currencies.
- All tables presented in this report are subject to small rounding errors. Therefore, column and row numbers, as presented, may not add up exactly to the total presented.

1.4 Definitions

Table 1-1 lists the industry segments that are detailed in Chapters 3, 4, and 5 (with slightly varying levels of aggregation). This list is fundamentally the same as that used in related NVR reports.

Several critical terms will be used frequently in this report. They are:

- *PCB Assembly*: For this report, PCB assembly refers to the attachment of various electronic components onto a bare printed circuit board, plus any test activities performed at this level of assembly.
- *PCB Assembly Value*: The value (cost of goods sold, or COGS) of all material, labor, and overhead associated with an assembled printed circuit board

- *Box Assembly*: For this report, box assembly refers to the assembly of one or more printed circuit boards, plus other items such as cable harnesses and enclosures, into a final product (or a largely self-contained electronics assembly that will be embedded into a larger piece of equipment). This also includes any test activities performed at this level of assembly.
- *Box Assembly Value*: The value (COGS) of all material, labor, and overhead of the box assembly, not including the value of the assembled PCBs within the box assembly
- *OEM Assembly*: Electronics assembly performed by the OEM. If assembly is performed by a subcontractor that is held captive by the OEM or in a *keiretsu* arrangement such as exists in Japan, the assembly is considered OEM produced.
- *ODM Assembly*: Electronics assembly performed by an OEM but subcontracted by another OEM. For example, Hewlett-Packard subcontracts the assembly of its printers and computers to Compal Electronics and Quanta Computer—OEMs with their own printer and computer product brands as well.

1.5 Research Methodology

Information for this report was collected from a number of external sources. Primary sources included marketing professionals, manufacturing and engineering directors in contract manufacturing firms, and OEMs. Also, *Manufacturing Market Insider*, a newsletter acquired by NVR on July 1, 2014, has been a valuable source for tracking industry events and specific company activities on a monthly basis. Secondary sources included trade publications such as *Circuits Assembly*, *EMSNow*, *Evertiq.com*, *SMT Magazine*, *EMSNow Daily*, *Business Week*, *The Economist*, and a variety of government economic reports.

For this report, the author had the cooperation of many EMS company employees who answered the questionnaire provided below, in addition to information collected from the *MMI* March 2018 newsletter in which the Top 50 EMS companies worldwide are ranked. These and other efforts helped to size and segment the industry to a degree not previously attained. The author's gratitude is extended to all those gracious enough to have responded to this request for information.

1.6 Field Questionnaire

The following questionnaire format was generally used as a starting point for the primary research conducted for this report.

NVR Contract Manufacturing Company Profile

1. What were your EMS revenues for 2018 (USD)?

2. What percentage of your sales were manufacturing services (EMS) versus your own branded products (ODM)?

3. Please list your plant/facility locations, sizes (sq. ft.), number of SMT lines, and employees.

<u>Location</u>	<u>Plant Size</u>	<u>SMT Lines</u>	<u># of Employees</u>
-----------------	-------------------	------------------	-----------------------

4. What industries and customers does your company serve?

<u>Industry</u>	<u>Percent</u>	<u>End Products</u>	<u>Customers</u>
Automotive	_____	_____	_____
Communications	_____	_____	_____
Computer/Peripherals	_____	_____	_____
Consumer Products	_____	_____	_____
Industrial Products	_____	_____	_____
Medical Products	_____	_____	_____
Defense/Aerospace	_____	_____	_____
Total	100%		

5. Can you estimate your company's revenue for 2018 and its growth by industry?

<u>Industry</u>	<u>Percent Growth</u>
Automotive	_____
Communications	_____
Computer/Peripherals	_____
Consumer products	_____
Industrial Products	_____
Medical Products	_____
Defense/Aerospace	_____
Est. Revenue 2018	\$_____

6. If not provided in question 4 above, please identify your leading customers.

1.7 Market Segments

Aviation/Defense/Other Transportation	Automotive
In-flight Entertainment Flight Navigation Weapons, Drones C3 Other Transportation Aviation/Defense/Other IoT	Engine Control Instruments Safety Entertainment Automotive IoT
Communications	Consumer
Cellular Handsets Cellular Infrastructure Other Phones Enterprise LANs WLANs DSL/Cable Modems PBX/Other CPE Carrier-Class Equipment Other Telecom	Analog TVs Digital TVs MP3/MP4 Players Smart Home and A/V Video Console Games Set-Top Boxes Camcorders DVD Players Digital Cameras Other Consumer Consumer IoT
Computers/Peripherals	Industrial
Notebook PCs Desktop PCs Tablets/Readers Servers Workstations Enterprise Storage Systems Flash Drives Monitors Printers Other Computer	Control/Processing Test and Measurement Clean Energy Other Industrial Industrial IoT
	Medical
	Medical Diagnostics Therapeutic Monitoring and Surgical Medical IoT
